PROJECT

Student Consultancy Platform Go live

Next.js, Tailwind CSS, Shadcn UI, Node.js, Express.js, [Github](#)
PostgreSQL

- A live full-stack web app for a student consulting organization to make it easier to handle student questions and data.
- The frontend was built with Next.js to provide SEO-friendly, fast-loading pages with full information to prospective students.
- Using Tailwind CSS and Shadcn UI components, I created an easy and responsive user experience for both desktop and mobile devices.
- Implemented a custom student application form integrated with Zod validation hooks for robust input handling and error control.
- Utilized PostgreSQL for reliable data storage and efficient query handling of student submissions.
- Built a secure backend for admin using Node.js and Express.js, including admin route authentication for protected data access.

Ticketing Website Go live

TypeScript, Tailwind CSS, React, Vite

- Developed a responsive web application using React.js for event browsing and ticket booking.
- Built modular and reusable UI components with a focus on scalability and performance.
- Integrated React Router for smooth client-side navigation between pages.
- Applied Tailwind CSS Modules for scoped, maintainable, and responsive styling.
- Followed best practices in frontend architecture and component organization.
- Dark mode and light mode have been added for all pages.
